## EXPERIENCE

### TECH IS (Bootcamp), Bengaluru - Full Stack Web Developer(Tutor)

February 2022 - PRESENT

- I train 10+ US professionals everyday to become a full-stack web developer via zoom
- I solve 50+ technical doubts of our students everyday
- I have worked on 10+ full-stack projects where I used all required skills like HTML, CSS, JS, React, Django, Redux, Git, GitHub, Replit

## PROJECTS

### HiveTech Wear (E-commerce website)

- Built 10+ Application Programming Interface (APIs) which is quite indispensable when comes to working on different software
- Established 20+ front-end website architecture which includes designing interactive, all-device responsive web pages
- Acquainted with the current developments in the world of web development of 2 core areas of frontend and backend
- Learned about 20+ emerging concepts in full stack, and managed all the activities of project members regarding the same
- Structured the application by Redux & React as Frontend and 2+ Django tools as Backend
- GitHub Link: <https://github.com/KhanTaufeeq/Hive-Tech-Wear>
- Replit Link: <https://hive-tech-wear-frontend.khantaufeeq.repl.co/>

---

## Budget Box

- Built 10+ Application Programming Interface (APIs) which is quite indispensable when comes to working on different software
- Established 20+ front-end website architecture which includes designing interactive, all-device responsive web pages
- Acquainted with the current developments in the world of web development of 2 core areas of frontend and backend
- Learned about 20+ emerging concepts in full stack, and managed all the activities of project members regarding the same
- Structured the application by Redux & React as Frontend and 2+ Django tools as Backend
